A. SIGNIFICANT ITEMS

Nothing to report

B. NORMAL ACTIVITIES

1. This office has just received a copy of Department of Defense Directive S-1315.3 dated December 5, 1957, subject: Policies Governing Assignment of Military Personnel to the Central Intelligence Agency. This directive cancels previous directive, same title, dated 9 December 1952. Of significance to the JOT Program is paragraph III F which is quoted herewith:

"Training Agreements

The provisions of this policy will not affect present or future agreements which CIA may make with the Services to provide military training for Junior Officer Trainees of the Agency."

2. An outline concerning the JOT Program has been submitted to A/DTR for submission to Colonel Grogan in the hope that material of this nature may be incorporated in an article by the DCI which may be published by a magazine.

3. A number of matters concerning the covert recruitment and training of a pilot group of JOT's were discussed with Mr. Karamessines who was most helpful in making suggestions and raising questions to be solved.

4. As a matter of interest, it is worth noting that the DDI's office reports that for 55 days while [redacted] was on sick leave, JOT [redacted] carried the entire responsibility usually assumed by his supervisor.

5. Academic progress reports [redacted] for the period 1 September 1956 to 30 June 1957 have just been received. In each case it was reported that "his progress has been excellent" and that he is "one of the top language students in his class". Other comments are of only casual interest.
